

Policy Guidelines on Classroom Assessment for the K to 12 Basic Education Program  
Modifications to DO 8, s. 2015

Dear Parents and Students:

Pleasant greetings in St. La Salle!

The De La Salle Medical and Health Sciences Institute – Special Health Sciences Senior High School would like to inform you on some modifications the institution has made on the DepEd Order no. 8, s. 2015 - Policy Guidelines on Classroom Assessment for the K to 12 Basic Education Program approved by the Department of Education last February 1, 2017. DLSMHSI-SHSSHS has adopted the said guidelines but some changes have been made in order to align with the existing policies of the Institute.

1. A senior high school student must have an average final transmuted grade of **75** in order to pass a **Core** or an **Applied Track** subject.
2. Also, a senior high school student must have an average final transmuted grade of **80** in order to pass a **Specialized** subject.
3. A student having a final grade between **70 to 74** for Core and Applied Track subjects and **75 to 79** for Specialized subjects will be required to take and pass a **Remedial Class** for the subject in order to be promoted.
  - 3.1. A student can only have a maximum of **three (3) subjects** with a failed final grade per semester. Failing more than the aforementioned number of subjects, will automatically result to disqualification from the SHSSHS program.
  - 3.2. A student having a **final remediated grade lower than 75** in Core and Applied Track Subjects or **lower than 80** in Specialized Subjects will not be promoted to the next Grade Level and will have to retake the failed subject area the following School Year.
  - 3.3. A student who will successfully complete and pass the remedial class will get a final grade of **75** for the remediated Core, Applied Track subject and **80** for the remediated Specialized subject.

Thank you and God bless.
